PVC Wood Steel Fibreglass

A great window, door or patio door begins with experience, knowledge and most of all, passion.

Our team is passionate about artistry and craftsmanship. Every member not only has this passion, but is backed by years of experience.

Our job doesn't feel like work, because we do what we love – build beautiful windows and doors. No two are the same. Each has the personality and design requirements of the home it's being installed in, varying in design, colour and detail. And that's why our work is so close to our heart.

Choose KV Custom Windows + Doors for a design that will complement the architectural feel of your home and your personal style.

Fibreglass Framing System

Door Options & Accessories

The KV Proprietary Fibreglass Framing System combines the performance of Textured PVC with the strength and durability of Finger Jointed Pine Wood. The Finger Jointed Pine provides superior strength and integrity to the door frame, while the textured PVC Wrap provides a Woodgrain Finish and a maintenance-free product both inside and out. Design your perfect door with the flexibility of combining this framing system with our steel or fibreglass doors paired with your desired paint or stain finish.

KV — COLOURS

Express yourself through colour

Choose from 38 Standard Paint Finishes for the interior and exterior of your door. We will match any paint colour you desire. We use a premium paint formula for fade resistance and colour retention. Our water-based paints are environmentally responsible.

KV — COLOURS

Door Options & Accessories

Refer to the KV Colour Chart for all KV Standard Colours & Custom Colour Options.

Disclaimer: The colours shown are for representation only. Please consult a local KV Dealer for the KV colour chart to obtain accurate colours.

Standard Features

From frames to hardware, KV Custom Doors are comprised of many different elements. Each standard component works together in harmony to create the perfect door for the homeowner's needs. For more information about our standard features, contact a local KV Dealer near you.

Premium Weather-Stripping

A combination of magnetic and compression or an all compression configuration is standard on all KV custom door systems.

- Magnetic weather-stripping will engage your door to create a positive seal
- Compression weather-stripping will expand to create a positive seal
- Will not shrink
- Serves as a barrier between you and the elements
- Available in White, Cream and Black

Seamless Doorlite Frame

Standard on all non-shaped doorlites.

- Cellular Extruded PVC Foam make for a maintenance-free weatherproof doorlite frame
- Contemporary design enhances the beauty of the door system
- Dual seal interior flexible creates positive water seal
- Interior screw cover eliminates any visible screw plugs

Standard Features

Extruded Vinyl Door Frame

Multi-chambered extrusion for strength, durability and energy efficiency

- Four standard frame depths - 4 5/8", 5 5/8", 6 5/8" & 7 5/8"
- Installation strip conceals all screws used for installation
- Co-extruded flexible for water tight seal
- Available in standard white 141 & 136
- Can be painted to match any colour
- FJP Primed insert for structural strength & stability (available in Primed or Interior Vinyl Wrapped)

FJP Pine Frame (Standard Primed)

FJP Primed frame is standard on all KV Custom Door Systems.

- Frame depths available: 4 5/8" x 1 1/4" or 6 5/8" x 1 1/4"
- Eastern White Pine adds extra strength to keep the wood frame from warping or cracking
- All Jambs are available in Primed with options to Vinyl Clad or Oak Wrap
- Made from North American hand selected pine species

Standard Features

From frames to hardware, KV Custom Doors are comprised of many different elements. Each standard component works together in harmony to create the perfect door for the homeowner's needs. For more information about our standard features, contact a local KV Dealer near you.

Wood Lock Block

KV Steel Doors are prefinished with Polytex cool white paint requiring no additional finishing.

Durability

Door skins interlock with the stile, providing additional support to reduce delamination and stretching.

Strength and Security

16" wood lock block provides strength and security while accommodating residential hardware.

Energy Efficient

Filled with an insulating core of 100% CFC-free polyurethane foam, providing better energy ratings than a standard styrene core product.

KV Custom Patented Security Bar

This bar is mounted into the interior jamb and positioned behind the dead bolt and handle using four 4-inch screws.

If external force is applied to the door, the security bars' reinforcement of the jamb helps to prevent the jamb from splitting

Standard Features

Ball Bearing Hinges Standard

Brass, Satin Nickel, Black Chrome, Flat Black or Antique Bronze finishes are available on all KV Custom Door Systems.

- 2.5mm metal with smooth hinge action
- Self Lubricating
- No metal to metal contact

Sills & Sill Extensions

Door Options & Accessories

Low Profile Sill Options

- 4 5/8" & 6 5/8" LP fixed sill is available on all KV Custom Door Systems
- Low profile sill is perfect for retrofit application where interior crown height needs to be as low as possible
- The aluminum and vinyl sill is thermally broken to eliminate any frost or cold transfer
- Special anti-slip sill design
- Available finishes include Clear Anodized and Black
- Available sill depths from 4 5/8" to 12" overall

Black

Clear Anodized

02. Satin Nickel

03. Black Chrome

04. Brass

Anatomy

Anatomy

Door Options & Accessories

1. Low Profile Door Sill

Fixed aluminum sill is standard on all KV Custom Door Systems.

- Available sill depth from 4 5/8" to 12" overall
- The aluminum and vinyl sill is thermally broken to eliminate any frost transfer
- Textured profile to help assist in anti-slip surface

2. Extruded PVC Brickmold

Multi-chambered extruded vinyl brickmold.

- Welded corners for strength and durability
- Snaps into accessory groove for a positive water tight fit
- Wood filled for storm door application
- See your local KV Dealer for paint options

3. Weather Tight Adjustable Sweep

All KV Custom Door Systems come standard with the newly designed multi-fin weather tight sweep.

- Designed to integrate with the sill profile to offer superior fit and performance
- Multi-finned design to create positive seal against the elements
- Exterior co-extruded fin to help eliminate any exterior moisture from entering
- Interior screw cover helps to enhance the interior finish and conceal all visible screws
- Fully adjustable and easy to replace

4. Door Slab

24 Gauge hot-dipped galvanized steel.

- Provides long-lasting performance and resistance against rust and corrosion
- Standard factory white finish
- Solid Polyurethane foam core to fill air space and provide insulation and stability
- Continuous wood thermal break around perimeter of door to help eliminate hot and cold transfer and prevent frost and condensation
- See your local KV Dealer for paint options

5. Extruded Vinyl Door Frame

Multi-chambered extrusion for strength, durability and energy efficiency

- Four standard frame depths - 4 5/8", 5 5/8", 6 5/8" & 7 5/8"
- Installation strip conceals all screws used for installation
- Co-extruded flexible for watertight seal
- Available in standard white 141 & 136
- Can be painted to match any colour
- FJP Primed insert for structural strength & stability (available in Primed or Interior Vinyl Wrapped)

Door Options & Accessories

Multi-Point Lock System

For maximum security, KV Custom Windows + Doors offers a Multi-point Lock System that activates automatically by simply closing the door.

The upper and lower latches instantly engage and become 2 additional deadbolts. The door is locked when you simply turn the knob or key, engaging the central deadbolt.

KV Custom Windows + Doors is proud to provide Advanced Lock Features as options with your Entrance Door purchase.

Finishes

Customize your handle by choosing the following finishes to add the final touch to your entryway.

KV Custom Windows + Doors proudly offers beautifully designed products with state-of-the-art technology, providing your home with the pinnacle of energy, security and longevity.

Thermal Insulation

Protection from outside temperatures.

Low E Coating is an applied metallic coating that provides added protection against harmful UV rays and keeps your home insulated against energy loss during all seasons. The layers of transparent silver allow the glass to reject the sun’s heat in the summer and reflect furnace heat back into your home in the winter.

Argon Gas is an inert, low moving gas that gives the best thermal performance possible. By replacing the air between the panes of a glass unit with Argon Gas, heat loss is prevented.

Low E coatings and Argon Gas are standard on all KV Windows, Entrance Doors, and Patio Doors, creating the most balanced energy performance for both winter heatings and summer cooling.

Cold Weather

Radiant heat is kept inside your home during winter.

Warm Weather

UV is reflected back out in the summer.

KV Lifetime Warranty

So you can relax.

KV Custom Windows + Doors takes pride in offering our customers an industry leading “Limited Lifetime fully Transferrable” warranty. We give every Window, Entrance Door, and Patio Door our undivided attention and warrant that our products will be free of any material or manufacturing defects. We offer our Lifetime Warranty on solid PVC white and cream colours against blistering, peeling, flaking, cracking or fading. Windows and Doors with exterior paint have a 15-year warranty.

See your local KV Dealer for full details of the KV Warranty or to obtain a copy of the KV Warranty Certificate.

The Energy Star Program

Energy efficiency at its best.

The Energy Star Program helps homeowners make educated choices when purchasing new windows and doors. KV Custom Windows + Doors meets or exceeds in all of Canada’s four regions and offers maximum insulation during the coldest winters, hottest summers, and every day in between. Our products meet the Energy Star program guidelines for helping businesses and individuals protect the environment through the superior energy efficiency.

Protecting the environment

Making a positive impact on the planet.

At KV Custom Windows + Doors, we are proactive in controlling waste by recycling all unused raw materials in our manufacturing processes, including PVC, steel, fibreglass, glass, paper and cardboard. We also partner with Vision Extrusion & Cardinal to design new products that help reduce in-home energy costs.

KV Custom Windows + Doors values being innovative and are always searching for solutions to make life easier for customers. KV Custom Windows + Doors provides customers with industry leading products that reduce the amount of maintenance required in their home.

What is Condensation?

Condensation is the formation of moisture that appears on the inside surface of a Window, Patio Door or Entrance Door. It often occurs in winter when the warm air inside the house is a higher temperature than the colder air outside. The higher the moisture levels in the air inside the house, or the colder the temperatures outside, the heavier the condensation.

Condensation occurs first around the edge of the glass unit, where surface temperature are coldest. If a standard “aluminum” spacer exists, condensation will form on the glass edge when temperatures fall, even if there is minimal humidity indoors.

Black “S” Class Super Spacer®

All KV Custom Windows + Doors insulated glass units come standard with the industry leading warm edge spacer system, the Black “S” Class Super Spacer®. The patented Super Spacer® is the only non-metal spacer manufactured out of 100 percent polymer foam offering performance qualities greater than any other spacer system. Super Spacer® is placed around the edges of the glass unit, reducing the occurrence of condensation.

Strength Classification

The Super Spacer® has been tested using the toughest durability test, the P-1 chamber. Tests are done on a weekly basis, consisting of bombarding KV’s windows and doors with humidity and UV exposure.

Let’s talk

We welcome the opportunity to provide you with more information about the benefits of the Black “S” Class Super Spacer®, and how it minimizes the occurrence of condensation in your glass units today, tomorrow and for the life of your KV windows and doors.

Please contact your local KV Dealer to better understand your insulated glass options.
